A set| is a collection of objects. For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z.

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''.

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently encountered sets are

A set| is a collection of objects.| For example:

 with ``cow is an element of Z''. Frequently
encountered sets are

Z

A set is a collection of objects. For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently encountered sets are

Z = $\{\ldots, -2, -1, 0, 1, 2, \ldots\}$

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently
encountered sets are

Z = $\{\ldots, -2, -1, 0, 1, 2, \ldots\}$ (``integer numbers'')

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently
encountered sets are

Z = {...,-2,-1,0,1,2,...}   (``integer numbers'')
Q

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently
encountered sets are

```
Z = {...,-2,-1,0,1,2,...}        (``integer numbers'')
Q = {p/q : p,q∈ ℤ and q ≠
0}
```

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently encountered sets are

```
Z = {...,-2,-1,0,1,2,...}      (``integer numbers'')
Q = {p/q : p,q∈ ℤ and q ≠
0}    (``rational numbers''`rational numbers'')
```

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently
encountered sets are

```
Z = {...,-2,-1,0,1,2,...}      (``integer numbers'')
Q = {p/q : p,q∈ ℤ and q ≠
0}    (``rational numbers''``rational numbers'')
R
```

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently encountered sets are

```
Z = {...,-2,-1,0,1,2,...}     (``integer numbers'')
Q = {p/q : p,q∈ ℤ and q ≠
0}    (``rational numbers''··rational numbers'')
R = {decimal numbers}
```

A set| is a collection of objects.| For example:

$$Z = \{\text{cow}, \text{pig}, \text{elephant}\}.$$

We call the objects in Z the elements of Z. We write

$$\text{cow} \in Z$$

with ``cow is an element of Z''. Frequently encountered sets are

```
Z = {...,-2,-1,0,1,2,...}      (``integer numbers'')
Q = {p/q : p,q∈ ℤ and q ≠
0}    (``rational numbers''``rational numbers'')
R = {decimal numbers}       (``real numbers'')
```
